Yeah. I've let Chris Taylor and Amy Shields really take the lead on this particular issue of executing the specific orders of the EO relating to GSA work. Most of it relates to either vehicles, buildings or climate adaptation/water.

Other than the specific EO directive to work with GSA on those items listed above, are there other opportunities you are thinking of?

Environmental Stories:

Los Angeles Times - Officials squabble as underground fire burns near radioactive waste dump in St. Louis area – 10/20/15 - A fire is smoldering beneath a landfill in a densely populated suburb of St. Louis — and it has been there for five years. Underground landfill fires, or "smoldering events" as some officials call them, aren't rare. What makes the fire at the landfill in Bridgeton, Mo., so unusual is that it's less than a quarter of a mile from a large deposit of nuclear waste — with no barrier in its way.

Waste360 - The Bridgeton Landfill Fire Explained – 10/20/15 - In recent weeks, there's been a flurry of stories and reports about the Bridgeton (Mo.) Sanitary Landfill. An underground fire has smoldered on the site for more than five years, which is of concern because of radioactive waste that was buried on the site illegally in 1973.

Native American Times - New EPA Grant Accelerates Quapaw Tribe's Tar Creek Superfund Clean-Up - 10/20/15 - No group of people was hurt worse by the environmental tragedy of Tar Creek than the Quapaw Tribe of Oklahoma. And until now no group has done more to clean up the mess left behind from decades of lead and zinc mining. Recent events have greatly accelerated the clean-up process and delivered a realization, for the first time, that this 40-square-miles of devastation can be restored and put to good use.
